Assignment No-1

1.Define a problem statement and give a brief execute summer Snapshot

A) Execute summer is snapshot-

The problem is that farmers are facing problem that their crops are affected due to weather change randomly, transport their vegetable and fruit it is not delivering in time, their plants are getting destroye due to disease, they are not getting that what are prices of vegetable and fruits in market, and facing problem like dear seeds are not selling and buying problem.

B) Project Description-

We are taking this project to help the farmer their crops not getting destroy, the farmer or our "real hero" and without farmer, no country can progress. Farmers are the fundation of our food supply. As we have mentioned earlier, farmers are the lifeline of trajectory of Indian agriculture setup. Farmers not only decide the crop yield of reason but also the type of crop being produced. Several journals available online will stress the importance of farmers in running and economy and a society, government must take care of the farmers by providing monthly financial assistance and increasing the prices of the farmers yeild India is known as agriculture country. Most farmers are poor and many are not farmer by their choice but their family condition and education. And literally they work for whole year. And we want to help farmers to developing app we will make a app for them that will be easy to do anything.

C) Project Scope -

We will make one app for farmers it consist whether detection, facing problem during selling of vegetable and fruits, crops are getting affected by insect so we can provide it in app that you can upload a photo and the app detect that the vegetable are not selling in time so it can face loss so we can provide the feature that app can also consist GPS so we can see where the transport vehicle where it is what problem the vehicle is facing that it is not going in time the vegetables are getting dam is there is weather feature that farmers will know that after sometime the weather is changing so they can alert that weather farmer are getting difficulties that farmers don't know what is price of vegetables in market so in app they will see that the feature also this app will very useful for farmer somer will take app and app helps them.

Buy and Sell - Plants and Seeds
